the way

Supporting you, every step along the way

Nobody is really looking for complexity in business. Because complexity often leads to mistakes, delays or losses. Unfortunately, the world all of us are doing business in, is sometimes quite complex. Looking for further business development, we all expand our international operations. And that doesn't make things easy.

- › As a multinational company, you deserve the **best partners**. Partners that can take away the headaches and make you feel comfortable again. With Daikin, you have found such a partner. Because Daikin would like things to be easy ... for you.
- › And we can help you with that. That's why we have developed our International **Partnership Program**. A program that will include all the items that will make your life easier, personalised to your situation and needs.
- › And that's why we also have a dedicated group of people, our international **key account team**, experts in their business and real organisers. They can rely on a **worldwide network** of colleagues and partners in all segments and aspects of our business. Always available to help you out.

Let's see what they and Daikin can do for you ...
... to make things easier.

... you can have free heating when looking at your building in a whole.

Daikin 1 international point of contact

Daikin Europe N.V.: The company

In 1973, Daikin Industries Ltd. established Daikin Europe N.V. to tailor the Daikin products to the specific needs and requirements of Europe, Middle East, Russia and Africa (EMEA). With the help of our extended network of over 5,400 employees in 50 EMEA countries, we can provide local support to our customers, wherever they may be. Daikin produces a highly energy efficient and comprehensive range of quality indoor climate control products and systems for commercial, industrial and residential applications.

Our product portfolio consists of heating, ventilation, air conditioning, control systems, applied systems and refrigeration products.

Daikin leads the way

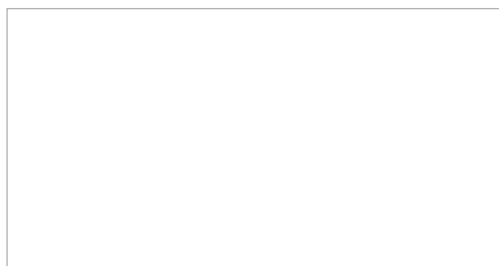

We consider environmental sustainability as one of our key values and this is reflected in everything we do. It led us to be in the frontline of new refrigerant development, pioneering in zero energy buildings and to be one of the biggest contributors in innovation and development of market leading technologies. We consider the long run, what about you?
